 BIPPER (AA_), 02/08 -
 BIPPER Tepee, 04/08 -

Figure 1: Pressure plate of the LuK RepSet® 620 3268 00

As part of the on-going development of our products, LuK RepSet® 620 3121 00 has been replaced by LuK RepSet® 620 3268 00. The new kit contains a pressure plate with a new design.

The most conspicuous difference is the form of the pressure plate, which is no longer cast and then machined, but rather formed out of steel. This eliminates the need to perform metal cutting operations on the friction surfaces in production.

Irrespective of this design modification, the pressure plate meets all technical specifications and can be used without restriction. The installation procedure remains the same as for the previous LuK RepSet®.

Please observe the vehicle manufacturer specifications!
